-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 13 and 14 are rejected under 35 U.S.C. 102(e) as being anticipated by USPN 6,767,104 to Worrell. Worrell discloses an indicator knob comprising;

A light transmitting indicator (20) extending outwardly of the an outer surface of the knob, a split trim ring (52) positioned on the outer surface of the knob with the ends of the ring terminating at the outwardly extension of the light transmitting indicator defining gaps between the split trim ring and the outwardly extension of the light transmitting indicator, and a light transmitting barrier provided at the gaps.

As to claim 14, the light transmitting barrier is a core body (42) of an opaque plastic.

Allowable Subject Matter

Claims 1-12 are allowed over the prior art of record.

The following is a statement of reasons for the indication of allowable subject matter: The prior art of record does not disclose or suggest the combination of features as set forth in applicant's claims. In particular, the prior art does not disclose or suggest a composite knob including a molded transparent core having a side wall and a top wall, an indicator window

Art Unit: 3677

formed in at least one of the side and top walls of the core and projecting outwardly, and a trim ring or disk positioned on the core and having an opening there-through receiving the indicator window. A cover mounted on the trim ring/disk and the core and having an opening there-through aligned with the opening of the trim ring/disk and receives a portion of the indicator window. A light transmitting indicator disposed within the indicator window, and an opaque plastic light transmitting barrier formed between the transmitting indicator window and the opening of the disk/trim ring.

None of the other prior art references disclose or suggest such a composite knob including the structural arrangement of the core, ring/disk and cover as set forth above.

Conclusion

Additional references are cited on the PTO 892 form but were not used to determine patentability of this application instead the references gave background information on luminous knob assemblies.
